TEORÍA MUSICAL

Posiciones del trombón bajo: complétalas

Escribe en qué posición de la vara (1.ª a 7.ª) se toca cada nota: marca con un círculo ● la posición y anota el armónico y, en el registro grave, qué válvulas hay que usar. Las notas son las escritas.

Nombre: Curso: Fecha:

Nota	Pentagrama	Posición 1 2 3 4 5 6 7	Armónico	Válvulas
La♯₁ / Si♭₁				
Si₁				
Do₂				
Do♯₂ / Re♭₂				
Re₂				
Re♯₂ / Mi♭₂				
Mi₂				
Fa₂				
Fa♯₂ / Sol♭₂				
Sol₂				
Sol♯₂ / La♭₂				
La₂				
La♯₂ / Si♭₂				
Si₂				
Do₃				
Do♯₃ / Re♭₃				
Re₃				
Re♯₃ / Mi♭₃				
Mi₃				

Nota	Pentagrama	Posición 1 2 3 4 5 6 7	Armónico	Válvulas
Fa₃				
Fa♯₃ / Sol♭₃				
Sol₃				
Sol♯₃ / La♭₃				
La₃				
La♯₃ / Si♭₃				
Si₃				
Do₄				
Do♯₄ / Re♭₄				
Re₄				
Re♯₄ / Mi♭₄				
Mi₄				
Fa₄				
Fa♯₄ / Sol♭₄				
Sol₄				
Sol♯₄ / La♭₄				
La₄				
La♯₄ / Si♭₄				

Cada posición baja la nota un semitono. La nota concreta se elige además con el **armónico** (la posición de los labios): por eso la misma posición sirve para varias notas. El registro grave del trombón bajo se toca con las **válvulas** (F, G♭ o las dos juntas, que dan Re).

El trombón bajo no transpone: lo escrito es lo que suena. **Fa♯ y Sol♭ son la misma nota**; por eso las alteradas llevan los dos nombres. Los subíndices son la octava.
