Write major and minor scales with a key signature

First write the key signature, then the scale, ascending from the tonic. Write only the accidentals that are not in the key signature. The major, harmonic major, melodic major and Mixolydian scales use the key signature of their major key; the minor and Dorian scales, that of their minor key. The melodic minor is written ascending and descending: 15 notes.

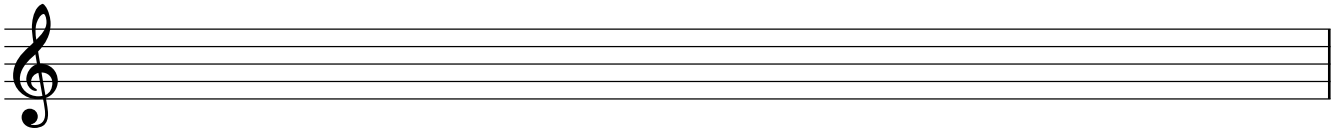

From easier to harder: key signatures with few accidentals in treble clef, then more accidentals and the bass clef.
