# Digitaciones de la tuba: complétalas

Escribe qué pistones hay que pulsar en cada nota: primero dibujándolos (● pulsado, ○ suelto) y luego con su número. La columna «Suena» te la damos como pista, porque es la que más cuesta.

**«Al aire»** es sin pulsar ningún pistón: la nota sale solo con los labios, ajustando el armónico. Son las filas resaltadas en la hoja de referencia.

**Fa♯ y Sol♭ son la misma nota**, solo cambia cómo se escribe según la tonalidad. Por eso las alteradas llevan los dos nombres. Los subíndices son la octava.
